

1 Report

AkzoNobel

2016

Our results at a glance

- Volumes up for all Business Areas and up 2 percent overall
- Revenue down 4 percent; higher volumes offset by adverse currency effects, price/mix and divestments
- EBIT (operating income excluding incidental items) up 9 percent at €334 million (2015: €306 million), reflecting continuous improvement initiatives and lower costs, partly offset by adverse currency effects
- Operating income up 17 percent at €357 million (2015: €306 million)
- ROS* improved to 9.7 percent (2015: 8.5 percent); ROI* improved to 14.5 percent (2015: 11.5 percent)
- Adjusted EPS up 28 percent at €0.97 (2015: €0.76)
- Net income attributable to shareholders up 50 percent at €240 million (2015: €160 million)
- Net cash outflow from operating activities improved to €336 million (2015: €622 million)
- Intended acquisition of BASF's Industrial Coatings business announced
- Launched €500 million 10 year bond at a coupon of 1.125 percent in April 2016

Outlook:

- The market environment remains uncertain with challenging conditions in several countries and segments. Deflationary pressures and currency headwinds are expected to continue

Financial highlights

Volumes up for all Business Areas and up 2 percent overall. Revenue down 4 percent. Higher volumes were offset by adverse currency effects, price/mix and divestments. EBIT (operating income excluding incidental items) up 9 percent at €334 million (2015: €306 million), reflecting continuous improvement initiatives and lower costs, partly offset by adverse currency effects. Operating income up at €357 million (2015: €306 million). ROS* improved to 9.7 percent and ROI* improved to 14.5 percent.

Revenue

Volumes were up 2 percent, while adverse currency effects, price/mix and divestments resulted in revenue down 4 percent.

- Revenue in Decorative Paints was down 3 percent. Volumes increased 6 percent, offset by negative currency effects, particularly in Latin America, as well as adverse price/mix. Volumes increased in Asia and Europe, while continued to be down in Latin America
- Revenue in Performance Coatings was down 3 percent, due to higher volumes offset by currencies and unfavorable price/mix. Demand trends differed per region
- Revenue in Specialty Chemicals was down 7 percent due to the divestment of the Paper Chemicals business, price deflation in several segments and adverse currency effects. Volumes were up 1 percent with positive developments in some segments partly offset by lower demand in oil related segments

Acquisitions and divestments

- The divestment of the Paper Chemicals business was completed in Q2 2015, and accounts for the divestment impact
- In Q1 2016, the outstanding shares in Eko Peroxide LLC, a hydrogen peroxide joint venture, were acquired. Hydrogen peroxide is a key component of AkzoNobel's bleaching chemicals product portfolio
- In Q1 2016, the intended acquisition of BASF's Industrial Coatings business was announced. The planned transaction is expected to be completed in the second half of 2016

EBIT and Operating income

EBIT increased 9 percent to €334 million in Q1, reflecting continuous improvement initiatives and lower costs, partly offset by adverse currency effects. Operating income increased 17 percent to €357 million.

- In Decorative Paints, EBIT and operating income increased 4 percent due to positive volumes and lower costs, partly offset by unfavorable currency developments
- In Performance Coatings, EBIT and operating income increased 9 percent, due to higher volumes, management delayering, continuous improvement initiatives and lower costs
- In Specialty Chemicals, EBIT and operating income increased 1 percent due to operational efficiencies and lower costs offsetting the effects of price deflation and adverse currencies
- In Other activities and eliminations, EBIT improved due to lower costs, in particular insurance related costs, and operating income was positively impacted by an incidental gain on sale of assets of €23 million

Raw material prices were lower, although in certain regions foreign currency effects adversely impacted raw material costs in local currencies.

Net financing expenses

Net financing expenses decreased mainly as a result of reduced external interest expenses following the repayment of a high interest bond in Q1 2015.

Tax

In Q1 2016, the effective tax rate was 25 percent (2015: 31 percent). The tax rate was positively impacted by non-taxable gains and an adjustment to previous years.

Net income

Net income attributable to shareholders was up 50 percent at €240 million (2015: €160 million).

Decorative Paints

- **Volumes increased 6 percent due to positive developments in Asia and Europe, offset by Latin America**
- **Revenue down 3 percent due to higher volumes offset by unfavorable currency effects and adverse price/mix**
- **EBIT and operating income up 4 percent, mainly due to higher volumes and lower costs, partly offset by unfavorable currencies**
- **ROS* increased to 6.0 percent (2015: 5.6 percent); ROI* increased to 12.0 percent (2015: 9.8 percent)**

Revenue was down 3 percent. Volumes increased 6 percent, offset by negative currency effects, particularly in Latin America, as well as adverse price/mix. Volumes were up in Asia and Europe, while continued to be down in Latin America.

EBIT and operating income increased 4 percent due to positive volumes and lower costs, partly offset by unfavorable currency developments.

Europe, Middle East and Africa

Revenue was flat due to higher volumes offset by unfavorable currencies, including the pound sterling, and adverse price/mix. Positive developments continued in the UK and the Netherlands. Volumes improved in several other countries.

Latin America

Revenue was down 27 percent with positive price/mix more than offset by adverse currency effects and lower volumes. Market conditions remained challenging as economic instability continued and currency devaluation led to raw material inflation. Improvement actions and cost control remained the focus in the region.

Asia

Revenue increased 4 percent due to higher volumes more than offsetting unfavorable currencies and adverse price/mix. Demand was positive in many Asian markets, particularly in South and South East Asia. In China, volumes were positive despite continued challenging conditions in the Chinese construction market.

Revenue development Q1 2016

Inspired by customer insight, our Decorative Paints business has developed an innovative wet tester to help consumers make more informed color choices when decorating their homes. The new user-friendly roller testers were designed following rigorous research and offer maximum convenience. Already launched with great success in France and the Netherlands, the new-look testers will soon be introduced in the UK and Ireland, with other regions to follow.

* ROS% = EBIT/Revenue. Moving average ROI (in %) = EBIT/12 months average invested capital

Performance Coatings

- Volumes up 2 percent mainly driven by Marine and Protective Coatings
- Revenue down 3 percent due to increased volumes offset by adverse currencies and unfavorable price/mix
- EBIT and operating income up 9 percent due to higher volumes, management delayering, continuous improvement initiatives and lower costs
- ROS* increased to 13.4 percent (2015: 11.9 percent) and ROI* increased to 30.4 percent (2015: 22.9 percent)
- Intended acquisition of BASF's Industrial Coatings business will strengthen our position

Revenue was down 3 percent due to higher volumes offset by adverse currencies and unfavorable price/mix. Demand trends differed per region. Volumes were up, mainly driven by Marine and Protective Coatings.

EBIT and operating income was up 9 percent due to higher volumes, management delayering, continuous improvement initiatives and lower costs.

Marine and Protective Coatings

Revenue was up 2 percent with volume growth partly offset by unfavorable price/mix and currencies. In Protective Coatings, higher volumes were driven by project backlog, which continued from Q4, although demand was impacted by lower capital spending in the global oil and gas industries. In Marine Coatings, volumes improved due to New Build projects in Korea, partly offset by weak Maintenance and Repair activities particularly in Europe.

Automotive and Specialty Coatings

Revenue was down 4 percent with positive price/mix offset by adverse currencies and lower volumes. New business in Asia for Consumer Electronics helped to offset a general slow down in Specialty Coatings. Automotive Coatings grew, particularly in North America and Europe.

Industrial and Powder Coatings

Revenue was down 4 percent mainly due to adverse currencies and lower volumes for some segments. Demand for Coil Coatings was strong in Asia and North America, supported by favorable weather conditions, while positive developments for Packaging Coatings in Europe and Asia did not offset lower demand in Americas. Volumes for Powder Coatings were healthy, while demand was subdued for Wood Coatings.

Intended acquisition of BASF's Industrial Coatings business

The business generated revenue of about €300 million in 2015 and supplies products for a number of end uses, including coil, furniture foil and panel coatings, wind energy and general industry, and commercial transport. The planned transaction is expected to be completed in the later part of the second half of 2016.

Revenue development Q1 2016

■ Increase ■ Decrease

New ultraviolet clear coat technology developed by our Performance Coatings business now enables vehicle bodyshops to cut their energy costs by up to 80 percent. The technology (available in both Sikkens and Lesonal brands) cuts drying time to just 12 minutes without baking. This provides a significant increase in productivity – in addition to the potential energy savings – when compared with traditional baking processes.

Number of employees	19,800	19,300	

* ROS% = EBIT/Revenue. Moving average ROI (in %) = EBIT/12 months average invested capital

Specialty Chemicals

- Volumes up 1 percent with positive developments in Industrial Chemicals partly offset by lower demand in oil related segments
- Revenues down 7 percent due to the divestment of the Paper Chemicals business, price deflation and adverse currency effects
- EBIT and operating income up 1 percent, due to operational efficiencies and lower costs offsetting the effects of price deflation and adverse currencies
- ROS* increased to 13.6 percent (2015: 12.6 percent); ROI* increased to 16.5 percent (2015: 15.3 percent)

Revenue was down 7 percent due to the divestment of the Paper Chemicals business, price deflation in several segments and adverse currency effects. Volumes were up 1 percent with positive developments in some segments partly offset by lower demand in oil related segments.

EBIT and operating income was up 1 percent, due to operational efficiencies and lower costs offsetting the effects of price deflation and adverse currencies.

Functional Chemicals

Revenue was down 6 percent, mainly due to formula based price deflation and adverse currency effects. Volumes remained flat. Production output was still impacted by the interruptions in the manufacturing and supply chain in Tianjin, affecting comparison versus Q1 2015. Availability improved compared with Q4 2015.

Industrial Chemicals

Revenue was down 3 percent with positive volume development offset by adverse price/mix effects. Volumes were higher mainly due to increased manufacturing availability in Frankfurt and Rotterdam.

Surface Chemistry

Revenue was down 7 percent reflecting lower demand and price deflation in oil related segments, especially in the Americas. Demand trends differed per region and were positive for Asia.

Pulp and Performance Chemicals

Revenue, excluding the impact of the divested Paper Chemicals business, was down 3 percent mainly due to adverse currency effects. Volume developments in Brazil and several segments in Europe remained positive.

Revenue development Q1 2016

Together with Evonik Industries, AkzoNobel broke ground on a production joint venture for chlorine and potassium hydroxide solution at the existing AkzoNobel location in Ibbenbüren, Germany. A new membrane electrolysis plant is being built which will improve the ecological footprint of every ton of chlorine we produce in Ibbenbüren by 25 to 30 percent. This will result in less energy use and fewer CO2 emissions.

Shareholders' equity

Shareholders' equity remained flat at €6.5 billion at the end of March 2016, mainly due to the net effect of:

- Net income of €240 million
- Negative currency effects of €191 million (including tax)
- An adverse actuarial impact of €25 million (including tax) reported in Other comprehensive income, including €90 million for de-risking of pension liabilities

Dividend

Our dividend policy is to pay a stable to rising dividend. A final dividend for 2015 of €1.20 per share is proposed to the AGM, which would make a total 2015 dividend of €1.55 (2014: €1.45) per share, up 7 percent. There will be a stock dividend option with cash dividend as default. Please refer to the last page of this Report for dividend payment dates.

Invested capital

Invested capital at the end of Q1 2016 totaled €10.1 billion (Q1 2015: €10.9 billion), up €0.2 billion on year-end 2015 mainly due to seasonality of operating working capital. Operating working capital reduced €0.2 billion compared with March 31, 2015.

Pensions

The net balance sheet position (IAS19) of the pension plans at the end of Q1 2016 was a deficit of €0.4 billion (year-end 2015: €0.6 billion). This was the result of the net effect of:

- Top-up payments of €277 million, predominantly into certain UK pension plans
- Higher asset returns and lower inflation

Offset by:

- Lower discount rates in the key countries
- De-risking of pension liabilities through a non-cash buy-in transaction of €419 million, related to the ICI Pension Fund, which led to a €90 million impact in Other comprehensive income

The triennial review of the AkzoNobel (CPS) Pension Scheme was completed in March 2016 and a new valuation and payment schedule was agreed with the Trustees, which resulted in a lower annual top-up contribution.

Workforce

At March 31, 2016, we employed 45,900 staff (year-end 2015: 45,600 employees), in comparison with 46,400 employees at March 31, 2015. With the introduction of Global Business Services (GBS) organization as of January 1, 2016 some employees are now reported at corporate level instead of within the Business Areas.

Invested capital

in € millions	March 31, 2015	December 31, 2015	March 31, 2016

Invested capital	10,941	9,829	10,058

Operating working capital

In % of revenue

Cash flows and net debt

Operating activities in Q1 resulted in a cash outflow of €336 million (2015: €622 million). The lower cash outflow in Q1 versus last year was due to lower working capital in all Business Areas, lower pension top-ups, as well as changes in provisions mostly due to less restructuring payments, and lower interest payments.

In April 2016, a €500 million bond was launched at attractive terms, with a ten-year maturity, at a coupon of 1.125 percent. A £250 million bond was repaid from existing sources in April 2016.

At March 31, 2016 net debt was €1.7 billion (2015: €2.3 billion) versus €1.2 billion at year-end 2015.

Outlook

The market environment remains uncertain with challenging conditions in several countries and segments. Deflationary pressures and currency headwinds are expected to continue. Please refer to our website for more information on our ambitions and the strategic focus areas.

Notes to the condensed financial statements

Accounting policies and restatements

This interim financial report is in compliance with IAS 34 "Interim Financial Reporting". This report is unaudited. The IFRS changes applicable as from January 1, 2016 do not have any or only an immaterial effect on our Consolidated financial statements. Otherwise the accounting principles are as applied in the 2015 financial statements.

Seasonality

Revenue and results in Decorative Paints are impacted by seasonal influences. Revenue and profitability tend to be higher in the second and third quarter of the year as weather conditions determine whether paints and coatings can be applied. In Performance Coatings, revenue and profitability vary with building patterns from original equipment manufacturers. In Specialty Chemicals, the Functional Chemicals and the Surface Chemistry businesses experience seasonal influences. Revenue and profitability are affected by developments in the agricultural season and tend to be higher in the first half of the year.

Other activities

In other activities, we report activities which are not allocated to a particular Business Area. Corporate costs are the unallocated costs of our head office and shared services center in the Netherlands and also include country holdings. Pensions reflects pension costs after the elimination of interest cost (reported as financing expenses). Insurances are the results from our captive insurance companies. Other costs include the cost of share-based compensation, the results of treasury and legacy operations.

Glossary

Adjusted earnings per share are the basic earnings per share from continuing operations excluding incidentals in operating income, amortization of intangible assets and tax on these adjustments.

Comprehensive income is the change in equity during a period resulting from transactions and other events other than those changes resulting from transactions with shareholders in their capacity as shareholders.

EBIT is operating income excluding incidental results.

Emerging Europe: Central and Eastern Europe (excluding Austria), Baltic States and Turkey.

Incidental results are special charges and benefits, results on acquisitions and divestments, major impairment charges, and charges related to major legal, anti-trust, and environmental cases.

Invested capital is total assets (excluding cash and cash equivalents, investments in associates, the receivable from pension funds in an asset position, assets held for sale) less current income tax payable, deferred tax liabilities and trade and other payables.

Mature markets comprise of Western Europe, the US, Canada, Japan and Oceania.

Net debt is defined as long-term borrowings plus short-term borrowings less cash and cash equivalents.

Operating income is defined in accordance with IFRS and includes the incidental results.

Operating working capital is defined as the sum of inventories, trade receivables and trade payables of the total company. When expressed as a ratio, operating working capital is measured against four times last quarter revenue.

ROI is calculated as EBIT of the last twelve months as percentage of average invested capital.

ROS is EBIT as percentage of revenue.

OPI margin% is operating income as percentage of revenue.

SG&A costs includes selling and distribution expenses, general and administrative expenses and research, development and innovation expenses.

Safe Harbor Statement

This report contains statements which address such key issues as AkzoNobel's growth strategy, future financial results, market positions, product development, products in the pipeline and product approvals. Such statements should be carefully considered, and it should be understood that many factors could cause forecast and actual results to differ from these statements. These factors include, but are not limited to, price fluctuations, currency fluctuations, developments in raw material and personnel costs, pensions, physical and environmental risks, legal issues, and legislative, fiscal, and other regulatory measures. Stated competitive positions are based on management estimates supported by information provided by specialized external agencies. For a more comprehensive discussion of the risk factors affecting our business, please see our latest Annual Report.

Brand and trademarks

In this report, reference is made to brands and trademarks owned by, or licensed to, AkzoNobel. Unauthorized use of these is strictly prohibited.
